WHAT WE DO

We help Series A+ companies evolve their security process and culture

0xMIDNIGHT

Security Reviews

Big picture review of your entire security stance, from the perimeter to the endpoints, from the policies to the forgotten servers

Security Playbooks

Your security is only as good as your ability to respond to the unexpected

Code Policy Violations

Security Services

- End-to-end web2 request security evaluation (WAF / DDoS protection, HTTPS / TLS, etc)
- Secrets Management, rotation automation, password discovery
- Compliance controls, ISMS, audit certification support for ISO, SOC2
- Onboarding / Offboarding processes, SSO / SAML integration and RBAC
- Log management, File Integrity Monitoring, Intrusion Detection
- AppSec assessments and remediation (OWASP Top 10, Session takeovers)
- AWS Security evaluation, reporting, and best practice review

our team is able to help

- Static code analysis, CVE scans, container image audits
- Red team exercises and adversarial testing
- Blue team defense-in-depth analysis and implementation
- Creation of Bug Bounty and / or Vulnerability Disclosure Programs
- Review & writing of security policies
- Incident Response automation and enhancements to existing processes
- Endpoint perimeter review, Vulnerability Intelligence
- Security LMS & Training

HOW WE WORK

0xMIDNIGHT

{ Phase I }

6-12 week initial phase where we take stock of your security stance, fix some of your biggest issues and begin evolving your security process.

Review

Fire-fight

Deploy Playbooks

{ Phase II }

6-12 week follow up phase where we implement long term improvements to your security story where security becomes a strategic advantage for your team instead of a liability

Observability

Coaching

Quarterly Review
